

[logo]

**The educational process aspires to impart students with a sense of value, gross and capability, success and self-realization simultaneously with the experience of discovery and a response to curiosity. Furthermore, the educational process aspires to develop students as active people, who integrate into society and contribute to it.**

**So that this process achieves its goals, the education system must enable meaningful learning in each educational sequence and ensure the balance necessary between self-realization and social obligation**

(From: "The Students, the Teacher and What Lies between Them  
Ministry of Education, 5764)
